

VECTOR ASSIGNMENT

Shristy Sharma (EE22BNITS11001)

1 PROBLEM 1

1. Find a vector in the direction of the vector $\begin{pmatrix} 5 \\ -1 \\ 2 \end{pmatrix}$

which has magnitude 8 units.

SOLUTION:

Let the required vector be $c \begin{pmatrix} 5 \\ -1 \\ 2 \end{pmatrix}$, where $c \in \mathbb{R}$.

Since this vector has magnitude 8,

$$\left\| c \begin{pmatrix} 5 \\ -1 \\ 2 \end{pmatrix} \right\| = c \sqrt{5^2 + (-1)^2 + 2^2} = 8 \quad (1.0.1)$$

$$\Rightarrow c = \frac{8}{\sqrt{30}} = \frac{4\sqrt{30}}{15} \quad (1.0.2)$$

$$\text{Thus, the required vector} = \frac{4\sqrt{30}}{15} \begin{pmatrix} 5 \\ -1 \\ 2 \end{pmatrix} = \begin{pmatrix} 7.30296743 \\ -1.46059349 \\ 2.92118697 \end{pmatrix} \quad (1.0.3)$$
